Relativistic time of flight: known start, straight constant-speed path
Analytic model; no MC or reconstructed events
Reference ray: L=7.295 m
Outer front-ray range; not an error band
Published 35 ns time selection
Historical label floor: 0.3 GeV
Flight time [ns]
Neutron kinetic energy [GeV]
150 ps: single-hit timing term
212 ps: hypothetical equal start + hit SD
Local timing contribution to sigma(T)/T [%]
Neutron kinetic energy [GeV]
