SMASH validation: both arms on the same MC-label tasks
Native baseline B0
No energy clause
Random ROC reference
MC-positive prevalence
Native 0.3-GeV reference
Disabled-clause reference
True-positive fraction
False-positive fraction
Precision
Recall
Reconstructed scores / MC labels
290 validation groups; 2.87 GeV/A; no B selection. Curves: equal fold macro, then mean +/- SD of 3 seeds.
Epochs selected on this validation. Interpolated curves are display summaries; AP is computed directly per fold.
